WEATHER FORECAST

Issued: 630am Tuesday Apr 22, 2025

Time	8am	10am	12pm	2pm	4pm	6pm
Sky						
Weather	Patchy Fog Possible	Partly Cloudy	Isolated Showers Possible	Partly Cloudy, Iso. T-storm	Partly Cloudy, Iso. T-storm	Partly Cloudy, Iso. T-storm
Rain Probability	0%	10%	15%	20%	20%	20%
Lightning Probability	0%	0%	5%	10%	15%	15%
Temp (F)	71	77	81	83	82	81
Winds (mph)	SE 4-8	S/SE 5-10	S/SE 6-12	S/SE 6-12	S/SE 6-12	S 5-10

Today – Patchy light fog is possible through 8AM across the course. As the sun begins to shine through the late morning, isolated showers will become possible in the area with timing favoring beyond 2PM. A pop-up strong t-storm or two is not out of the question this afternoon, but coverage across the area will remain isolated. S/SE winds will near 6-12mph alongside PM highs in the low-to-mid 80s.

Sunrise: 647am / Sunset: 754pm

Winds (mph)	S/SE 7-14 G20	S 7-13	S 6-12	Vrbl → SE 7-13	S/SE 8-15 G22

Extended forecast – An active but messy pattern will remain across southeast Texas through the work week. Isolated to scattered showers and thunderstorms are possible each day with coverage most expansive Wednesday. Thursday and Friday will feature more isolated activity through the PM hours as surface heating commences. Rainfall totals will vary greatly depending on where storms initiate. General S/SE flow the next several days will continue to provide the region with warm and unstable air allowing for the continual threat through Friday. Drier conditions forecast through the weekend.

Forecast prepared by meteorologist Tim Calamari.
