**Extended Forecast** – A series of low pressure systems along a slow-moving front will result in an extended period for waves of showers across southern AL. Tstorms are expected to remain further south across the Gulf, but periods of heavy rainfall will be possible throughout Thursday and Friday. Some lingering activity will be possible on Saturday but is not expected to be as widespread. Dry weather is then expected on Sunday into early next week. Overnight lows will be in the 40s with daytime highs in the 50s to lower 60s. Winds are expected to remain relatively light through the period.
