Today – A rogue complex of storms impacted the course prior to 9PM yesterday providing brief heavy rainfall. Partly cloudy skies this AM will become mixed through 10AM with isolated shower development possible prior to Noon. With hot and unstable conditions across the area, scattered t-shower potential will increase through 1PM. Heavy downpours and lightning activity will be possible within the stronger cells across the region. East winds will gust near 18mph at times before becoming variable within cell activity.
