**Extended Forecast** – The next rain system will begin to approach the area on Sunday leading to increased cloud cover, but dry conditions are expected throughout the day. Temperatures will continue to warm on Sunday reaching near 70 F (21 C) and winds will weaken with a swirling wind throughout the day. Sustained winds and wind gusts will remain less than 15 mph (24 km/hr). Overnight Sunday into Monday, rain will move towards and eventually into the area. Monday through Wednesday rain showers will be common with a few millimeters of rain each day. This system moves out of the area Thursday. Winds will vary throughout each day and between days in terms of speed and direction, primarily depending on if it is actively raining, but winds are generally expected to remain below 20 mph (32 km/hr).
