Extended forecast – As a cold front passes through the region, slight chances for an isolated shower or storm will continue through Thursday. Any higher rainfall than the forecasted amounts would localize within a heavier shower or storm. High temperatures will continue near 80F with west-northwesterly flow beginning to increase across the region. Post-front, a cooling trend is forecast this weekend with dry conditions and partly cloudy skies. Breezy winds may hold at times with occasional gusts near 20-25 mph possible – highest on Friday.
