Winds (mph)	ENE 5-10	ENE 4-9	SE 4-8	SW 4-8	WNW 4-8	NW 4-8

Today – Dry conditions will likely persist throughout today with occasional clouds to drift overhead. High temperatures will peak in the low 80s by midday before gradually falling to the low 70s after sunset. Winds are forecast on the lighter side flowing from the east-northeast this morning then turning out of the west-northwest this afternoon.

Rainfall: Trace-0.05”, if any. | Sunrise: 6:49am / Sunset: 5:41pm.

Winds (mph)	ENE → WNW 5-11 G16	WNW 6-13 G20	WNW 10-17 G25	N-NE 7-14 G21	ENE 6-12 G20

Extended forecast – Through midweek, slight chances for an isolated shower are forecast; any storm potential is at a lower likelihood. High temperatures will continue to hold near the low 80s with winds to gradually turn from the east-northeast to the west-northwest. By the weekend, dry conditions and partly cloudy skies are likely as high pressure builds into the region. Breezy winds may develop later Thursday into Friday as west-northwesterly flow slightly increases across the area. Additionally, a cooling trend will occur with high temperatures to peak in the 60s with overnight lows to trend in the low 50s.

Forecast prepared by DTN meteorologist Angel Howson.
