Winds (mph)	ENE 12-16 G20-25	E → ENE 10-15 G20	NE 5-10 → 7-12	NE → WNW 3-6 → 8-13	NNW → NW 4-8 → 8-13

Extended forecast – Expect widespread rain during the morning and early afternoon Wednesday before turning scattered for the balance of the day. A few embedded thunderstorms will remain possible on Wednesday. A pattern of isolated morning and scattered afternoon showers is anticipated for Thursday and Friday as a slow-moving upper-level disturbance continues to rotate across the Florida Peninsula – with thunderstorm potential remaining isolated each afternoon. Breezy east-northeasterly winds are forecast through Thursday before easing Friday through the weekend. A drier and more stable airmass is expected to gradually filter in through the weekend – with only a few showers lingering into Saturday while dry conditions are anticipated on Sunday. Morning fog is possible Friday through Sunday but should dissipate by 8:00-8:30am.

Forecast prepared by DTN meteorologist Joe Halvorson.
