Tomorrow – As the area of low pressure continues to lift northward, an isolated shower is possible within the morning hours. Cool conditions will return with winds to begin turning out of the west. Later in the day, chances for scattered rain showers and isolated thunderstorms will increase – primarily after 2pm. Outside of precipitation, winds will settle out of the west to northwest and become slightly breezy around the area. Any isolated wind gusts approaching 20 mph will likely favor open areas. High temperatures will likely return to the mid 20s during the afternoon.
