Winds (mph)	NNW 4-8	NNW 5-10	NNW 6-12 G18	NNW 6-12 G20	NNW 6-12 G20	NNW 4-9

Today – As high pressure settles over the region, mostly clear skies and dry conditions will prevail throughout today. Cool temperatures will continue this morning before gradually warming to the mid 60s by the late afternoon. Northwesterly flow is forecasted to slightly increase to 6-12 mph later today with occasional gusts approaching 20 mph. Temperatures and winds will taper after sunset.

Sunrise: 6:24am / Sunset: 8:43pm

Day	Fri	Sat	Sun	Mon

Temp (min/max)	43/70	56/77	62/87	65/91
Winds (mph)	S-SW 5-10 G15	SW 6-12 G22	SW 5-11 G20	SW 6-13 G23

Extended forecast – Later Friday afternoon, scattered rain showers may drift nearby with slight chances for isolated lightning within activity. By Saturday, increased chances for scattered rain showers and isolated thunderstorms are forecasted as a boundary moves nearby with the greatest potential to favor the afternoon – primarily after 11am – though slight chances cannot be ruled out in the morning hours. Some isolated stronger storms could develop in the later activity. Thereafter, any remnant showers or storms will move out of the area early Sunday morning with only slight chances for redevelopment to return later Sunday as well as Monday afternoon. A gradual warming trend will continue this week with highs to reach the upper 80s and lows to settle in the 60s; southwesterly winds are forecasted to remain around speeds of 5-13 mph with the occasional gusts within 20-25 mph possible.
