Tuesday – As a cold front moves through the area rainfall is expected to begin between 10am-12pm and end after sunset. Steady rain is expected through the early afternoon, before more scattered rain is expected through the remainder of the day. A few rumbles of thunder are possible throughout the afternoon. Winds will be gusty throughout the day with sustained winds near 10-12mph, and wind gusts consistently in the low to mid 20s. Temperatures will remain near constant in the mid 60s today.

Extended forecast – Showers may remain in the area through the morning on the backside of the cold front. Friday will likely remain dry, but shower chances return on Saturday and into next week. Scattered rain looks likely throughout Saturday, while rain looks to hold off until Sunday evening into Monday morning for the end of the weekend. Winds will remain strong throughout the week, with sustained winds in the teens and wind gusts ranging between 20-25 mph daily. Temperatures will be much cooler than earlier in the week with high temperatures in the low 60s. There is a chance of frost Friday morning.
