Today – After a cloudy start to the morning a sunny and warm day expected. Some clouds will come and go throughout the day, but largely sunny conditions are expected during the afternoon. This should allow the temperature to rise into the upper 60s F (near 20 C) today. Winds will be similar to the past few days from the northwest around 10 mph (16 km/hr) sustained with some gusts of 20 mph (32 km/hr). A low-pressure to the north will begin to influence the weather in the area leading to a pattern change tomorrow and into the weekend. **Sunrise: 0459 / Sunset: 2138**

Extended Forecast – Dry conditions are still expected through Friday afternoon. Overnight Friday, a cold front is expected to approach the area. The first round of rain will primarily come overnight into Saturday with rounds of rain on Saturday and then another wave overnight into Sunday with lingering rain on Sunday. A few brief heavy downpours are possible, but the majority of the rain will be on the lighter side. Total rainfall over the two days looks to remain less than 12 mm (0.5"). Winds will pick up along this front as well with elevated westerly/northwesterly winds through the weekend. Sustained winds will remain between 10-20 mph (16-32 km/hr) this weekend and temperatures will continue to cool off each day reaching only the low 60s F (upper 10s C), by the end of the weekend.
