Extended Forecast – The pattern will remain the same Wednesday with northwest winds, dry, and mostly sunny conditions. Thursday into the weekend, a low-pressure system to the north will usher out the high pressure and calmer conditions. Overnight Friday, a cold front is expected to approach the area leading to rain showers Saturday and Sunday. Winds will pick up along this front as well with elevated westerly/northwesterly winds through the weekend. Rainfall amounts each day look to remain less than 10mm (0.4"). A few brief heavy downpours are possible, but the majority of the rain will be on the lighter side. Winds will remain between 10-20mph (16-32km/hr) this week and temperatures cool off each day reaching only the low 60s F (upper 10s C), by the end of the weekend.
