Sunday – Similar conditions to Saturday are expected today with drizzly, windy, and cool conditions through late-morning. Scattered rain showers will remain in the area, but heavy rain and lightning are not expected. Due to the scattered nature of the rain, dry periods are likely throughout the day, especially in the afternoon. Winds will turn from the west to the northwest and increase slightly with sustained winds still near 20 mph (32 km/hr), but some wind gusts up to 30 mph (48 km/hr) will be possible. Cool temperatures in the low 60s F (upper 10s C) are expected today.

Rainfall: 1-3 mm (0.05'0.10") | Sunrise: 0505 / Sunset: 2132

Monday – High moisture levels and broad low pressure in the area will keep chances of passing drizzles/ light showers throughout the day, but largely dry conditions are expected. Winds will be lighter than previous days and temperatures will warm slightly. Sustained winds near 10 mph (16 km/hr) are expected throughout the day and temperatures will likely warm into the mid 60s F (upper 10s C) by the late afternoon. **Rainfall: Trace, if any. | Sunrise: 0507 / Sunset: 2130**
