

TUESDAY, JUNE 2, 2026 - 5 AM U.S. WOMEN'S OPEN FORECAST

A layer of high clouds moving onshore this morning will allow the marine layer to hold on a bit longer this morning in the form of heavy, low-level clouds. The delay in sunshine reaching the surface will do enough to limit our afternoon temperatures to the upper 60s. Once the marine layer burns off, expect for a sparse array of clouds to linger above the course throughout the day. Winds will start the morning off light from the south before transitioning over to the southwest as the marine layer retreats back to the coastline. As we warm up today, speeds will increase back into the 8 - 12 mph range accompanied by gusts in the low 20s at times this afternoon before fading back down overnight as flow returns to the southeast for Wednesday morning.
