

WEDNESDAY, JUNE 3, 2026 - 5 AM U.S. WOMEN'S OPEN FORECAST

The marine layer was able to secure the support of high-level clouds granting us another gray morning that is expected to last into the afternoon with what is shaping up to be the cloudiest day of the week as moisture funnels down from Northern California. Temperatures will have a similar heating pattern as yesterday as the sun struggles to penetrate the marine layer through the morning as temps climb slowly through the low-60s throughout the morning with highs relegated to the upper-60s once again this afternoon. No real change with our winds, especially in terms of direction with flow slowly returning to the southwest through the morning, settling there this afternoon with gustier conditions early this evening as the sun finally breaks through to the surface.
